Boa

the vision

In 1994 the world's first Multi-use strap wrench was developed, Boa the company was set up two years later to market and distribute this product on a global basis, the boa constrictor strap wrench sold in excess of 15 million units making it a phenomenally successful invention and building on this success Boa went on to develop world firsts in many areas of the hand tool and power tool accessory markets.

From its entrepreneurial roots Boa continues to invent and develop products building on its foundations of innovation, quality and functionality. With manufacturing facilities in the UK and warehouse distribution in Germany and USA, Boa offers global solutions providing bespoke packaging and marketing, including managing POS material and new product launches. As an ISO 9001 accredited company Boa ensures that its services and processes are world class.

The Boa Team continues to make giant steps in developing new products and technologies in the hand and power-tool accessories industries, revitalising product sectors that are considered to be mature and creating new product sectors through our patented ideas. This along with our reputation for bringing real new ideas to the market make us one of the most admired companies in our market sector as well as one of the fastest growing.

At Boa we believe in sustainability and respect for the environment. We aim to operate our business in an environmentally responsible way, where possible resourcing from sustainable supplies and engaging in credible recycling programmes.

the future

The team at Boa like a challenge and to go beyond "standardised thinking": looking at products and market sectors in an inventive and original way.

We work closely with builders, plumbers, electricians, construction and maintenance engineers to understand the issues and challenges they face in their working day.

We then look to solve those problems – and not by wasting time making a cheaper, different coloured version of the same product that still does not do the job – but, by really addressing those difficult jobs that are tricky to tackle and time consuming to undertake.

Boa will continue to bring real solutions to the hand and power tool sector; developing products that not only work better but also stand the test of time. Our pioneering range of products set new industry standards. Our expertise in product development enables us to supply the biggest names in the hand/power tool and accessories market.

1 Professional Range
High performance tools designed for daily use.

2 Uber Range
High performance specialist tools.

3 Holesaw Arbor

4 Water Dispensing System & Guide
Making drills work more efficiently & aiding longevity.
